An Iberdrola Renewables Company

Our Company has purchased wind-generated Renewable Energy Certificates to offset 100% of the electricity used for our website hosting services.

This commitment will allow 4,412,000 kWh of wind energy to enter into the national electricity grid annually from May 2009 until May 2011.

This purchase makes a difference for the environment and promotes our nation's energy independence. The estimated environmental benefit is equivalent to planting about 2,390 acres of trees or not driving over 6.1 million miles per year.

The Renewable Energy Certificates are supplied by leading wind energy marketer and developer Community Energy – an Iberdrola Renewables Company.
